Alternative Fuels Jaico By S S Thipse Sdocuments2

Here are the eight fuels of the future that could be powering your car in decades to come. 1. Biofuel. Biofuels such as bioethanol (which can be used instead of petrol), are made from corn and sugarcane, whereas biodiesel is made from vegetable oils and animal fats. Both replace non-renewable crude oil-derived fuels.

Top nine alternative fuels for cars | RAC Drive

Alternative Fuel Vehicles (AFVs) are not powered solely by the conventional means of petrol or diesel and are generally regarded as better for the environment, as they tend to emit fewer polluting greenhouse gas emissions. AFVs may currently make up a relatively small proportion of the new-car market in the UK, but their share is growing as the cost of technology comes down and the selection of AFVs increases.

A Beginner ' s Guide to Alternative Fuel Vehicles - CarGurus

Compressed natural gas (CNG) is methane stored at high pressure. CNG can be used as an alternative to petrol, diesel and propane (LPG) and produces fewer undesirable gases than these conventional fuels. Pros: Cost-effective—30%-40% cheaper compared to diesel.

The startup's new technology could help companies turn carbon pollution into alternative fuels or plastics. 01 : 30 MIN SEC. Etosha Cave (Image credit: Opus 12 video) Factories and power plants often release a lot of carbon pollution. And without a government tax on that pollution, there ' s not always a clear financial incentive for companies ...

California startup Opus 12 aims to help polluters recycle ...

LPG or autogas is an alternative fuel, derived from natural gas processing and oil refining, with a lower carbon footprint and significantly less pollutant emissions than conventional fuels. Bio-LPG derived from various biomass sources is expected to emerge as a viable technology in the medium to long term.
