This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to

refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922936. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
