This edition includes commentaries on all movements (14 fugues and 4 canons), as well as suggested cadenzas for the Canone alla decima, a comparative study of nine available keyboard completions of the final fugue, and a discussion of the B-A-C-H motif as found in the Art of Fugue. The book is also a keyboard edition with a new approach to suggested pedal parts, which can be used by pianists and

harpsichordists as well as organists.

At last a vast amount of recent scholarship, pertaining to four centuries of theoretical developments including the Baroque, Classical, and Romantic periods, has been organized systematically in a single volume. In the Dictionary of Theorists, the major section of the volume, individual entries devoted to approximately 250 theorists supply all of the bibliographic information most scholars are likely to require: titles and publication data for each author's treatises and principal articles, as well as titles and locations of manuscripts; lists of translations, facsimile editions, and microfilm copies of each work; a bibliography of articles, books, dissertations, and encyclopedia entries pertinent to an author and his works; and a compilation of modern reviews of the books, translations, and facsimile editions cited. Author, title, and subject indices facilitate access to materials for various research topics in the areas of speculative and practical music theory, and to a lesser yet significant extent, in the areas of acoustics, aesthetics, lexicography, music analysis, musicology, orchestration, and performance practice. A chronology is provided so that the reader may determine at a glance, which authors were active at any point within the centuries covered.

The Ashgate Research Companion to Johann Sebastian Bach provides an indispensable introduction to the Bach research of the past thirty-fifty years. It is not a lexicon providing information on all the major aspects of Bach's life and work, such as the Oxford Composer Companion: J. S. Bach. Nor is it an entry-level research tool aimed at those making a beginning of such studies. The valuable essays presented here are designed for the next level of Bach research and are aimed at masters and doctoral students, as well as others interested in coming to terms with the current state of Bach research. Each author covers three aspects within their specific subject area; firstly, to describe the results of research over the past thirty-fifty years, concentrating on the most significant and controversial, such as: the debate over Smend's NBA edition of the B minor Mass; Blume's conclusions with regard to Bach's religion in the wake of the 'new' chronology; Rifkin's one-to-a-vocal-part interpretation; the rediscovery of the Berlin Singakademie manuscripts in Kiev; the discovery of hitherto unknown manuscripts and documents and the re-evaluation of previously known sources. Secondly, each author provides a critical analysis of current research being undertaken that is exploring new aspects, reinterpreting earlier assumptions, and/or opening-up new methodologies. For example, Martin W. B. Jarvis has suggested that Anna Magdalena Bach composed the cello suites and contributed to other works of her husband - another controversial hypothesis, whose newly proposed forensic methodology requires investigation. On the other hand, research into Bach's knowledge of the Lutheran chorale tradition is currently underway, which is likely to shed more light on the composer's choices and usage of this tradition. Thirdly, each author identifies areas that are still in need of investigation and research.

George J. Buelow's distinguished career as author, translator, editor, and officer of numerous musical associations is celebrated in this collection of essays. The volume, planned by his colleagues in honor of his sixty-fifth birthday, concentrates on three of his active interests-Handel studies, vocal music and singers, and the

history of music theory. The work concludes with an autobiographical sketch of the dedicatee's early life in Chicago and his formation as a musicologist.

This classic reference work, the best one-volume music dictionary available, has been brought completely up to date in this new edition. Combining authoritative scholarship and lucid, lively prose, the Fourth Edition of The Harvard Dictionary of Music is the essential guide for musicians, students, and everyone who appreciates music.

Why did prehistoric people start making music? What does every postwar pop song have in common? A “masterful” tour of music through the ages (Booklist, starred review). Music is an intrinsic part of everyday life, and yet the history of its development from single notes to multi-layered orchestration can seem bewilderingly specialized and complex. In his dynamic tour through 40,000 years of music, from prehistoric instruments to modern-day pop, Howard Goodall does away with stuffy biographies, unhelpful labels, and tired terminology. Instead, he leads us through the story of music as it happened, idea by idea, so that each musical innovation—harmony, notation, sung theater, the orchestra, dance music, recording, broadcasting—strikes us with its original force. He focuses on what changed when and why, picking out the discoveries that revolutionized man-made sound and bringing to life musical visionaries from the little-known Pérotin to the colossus of Wagner. Along the way, he also gives refreshingly clear descriptions of what music is and how it works: what scales are all about, why some chords sound discordant, and what all post-war pop songs have in common. The story of music is the story of our urge to invent, connect, rebel—and entertain. Howard Goodall's beautifully clear and compelling account is both a hymn to human endeavor and a groundbreaking map of our musical journey.

"The Facts On File Dictionary of Music provides in-depth explanations and examples of more than 3
