Hi all I have just bought a VW Sharan 2009 1.9TDI pd engine. It has the usual broken wires in the door loom wiring. The drivers door wiring in the rubber boot had more than 14 broken wires. After starting to repair with slightly better flexible wire I realised that the problem actually is the door fouling the rubber boot and breaking the wires.

The Volkswagen Sharan 1.9 TDI was first introduced back in 1995 and has proved very popular with families. With 47,000 Sharans and the shared platform of Ford Galaxy at 125,000 and the Seat Alhambra having 28,000 on the road, most independent garages will certainly have worked on these vehicles. This vehicle had been fitted with a 4-in-1 conversion kit by the garage and the customer had returned it after only two miles due to the excessive gear rattle.
