This edition highlights current issues and emerging trends in the field of educational psychology. The tenth edition continues to have in-depth, practical coverage with a focus on the intentional teacher by presenting up-to-the-minute research that a reflective, intentional teacher can apply. An "intentional teacher," according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become "intentional teachers," the author offers a set of questions to guide them and models best practices through classroom examples.
