For each text type, there is a model answer with tips on structure and content Functions Bank brings together all the key functional language from each unit

The Chemistry Maths Book is a comprehensive textbook of mathematics for undergraduate students of chemistry. Such students often find themselves unprepared and ill-equipped to deal with the mathematical content of their chemistry courses. Textbooks designed to overcome this problem have so far been too basic for complete undergraduate courses and have been unpopular with students. However, this modern textbook provides a complete and up-to-date course companion suitable for all levels of undergraduate chemistry courses. All the most useful and important topics are covered with numerous examples of applications in chemistry and some in physics. The subject is developed in a logical and consistent way with few assumptions of prior knowledge of mathematics. This text is sure to become a widely adopted text and will be highly recommended for all chemistry courses.

Engage students with examiner Sue Pemberton's unique, active-learning approach, ideal for EAL students. This new edition is fully aligned to the Extended part of the latest Cambridge IGCSE Mathematics syllabus (0580), for examination from 2020.

100% new. New Practical English video, featuring authentic interviews with real people. Shorter syllabus for Beginner-level students.

A help-at-a-glance answer book providing support for the new-edition geog.1 workbook, which has been revised and updated to deliver both the Programme of Study for Geography at Key Stage 3 and new teaching and learning needs for greater preparation for GCSE.
