Paper Plate Water Cycle Project - INFRARED TRAINING
How to make a water cycle model. It is best to do this outside in a sunny place. 1. Place the mug in the bottom of the bowl. 2. Add water around the mug so that it come up to 2/3rd of the mug - if you can draw on the bowl mark where the water level is.

Make a Water Cycle Model - Weather Science for Kids
Using the pitcher or bucket, pour water into the bowl until it is about ¼ full. Place the mug in the center of the bowl. Be careful not to splash any water into it. Cover the top of the bowl tightly with the plastic wrap. Tie the string around the bowl to hold the plastic wrap in place. Watch the bowl to see what happens. The "mist" that forms on the plastic wrap will change into larger drops of water that will begin to drip.

Lesson Plan - Create a Water Cycle - The Water Project
Water Cycle Baggie This idea is an oldie, but a goodie. Draw the water cycle on a ziplock bag, put some water at the bottom, then tape it to the window. Observe it for a few days. You'll see the evaporation and condensation right before your very eyes!
