Introduces the elements considered essential to English literature, in which writing became more personal and had a new sense of humanity.

Explains how to maintain or enhance systems running the Linux operating system

This popular Build-It-Yourself (BIY) PC book covers every step in building one's own system: planning and picking out the right components, step-by-step assembly instructions, and an insightful discussion of why someone would want to do it in the first place.

Details the evolution of literature and explores the writers, works, and events that have shaped literature.

'Einstein's Gift' follows the life and work of Nobel laureate Dr Fritz Haber, a man who risked everything for a country that never accepted him. Haber, a chemist who worked hard to enhance life, discovered too late that when his knowledge was put in the hands of the wrong people, millions would die and that his efforts to serve humanity were futile against political will, nationalism, and war.

Pentium Processor System Architecture describes the hardware architecture of computers using Intel's family of Pentium processors, providing a clear, concise explanation of the microprocessor's relationship to the rest of the system. Written for computer hardware and software engineers, this book details Intel's technical strategy behind the Pentium family of processors - not just how Intel designed Pentium, but why. This revised edition expands coverage of virtually every topic and adds new sections on the Pentium 90 and 100MHz (P54C) processors. In addition to pointing out the key differences between 80486 and Pentium system designs, the book explores all the important Pentium features.
