~~The Skeletal System~~

The skeletal system consists of 206 bones that make up the internal framework of the body, called the skeleton. The skeleton supports the body, protects internal organs, serves

Online Library Pearson Education The Skeletal

as a point of attachment for skeletal muscles for body movement, produces blood cells, and stores minerals.

Organs

System: Guided Answers.
are skeletal, striated, and voluntary.

Skeletal muscle is responsible for overall body mobility. It can contract rapidly, but it tires easily and must rest after short periods of activity. Nevertheless, it can exert tremendous power.
