find Solution Manual

For Probability

Concepts In

Engineering, what

would you do first?

Probably, you would

go to the library or a

bookstore. The first

option takes a lot of

time, and it is not very

convenient because

not all books can be

taken home. The

second option is

Emphasis on ...  
Therefore when the  
events are  
independent, the joint

# Get Free Probability

probability is just the product of the individual marginal probabilities of the events:  $P(A \cap B) = P(A) P(B)$ . So  $P(\text{coin landing heads and rolling a 6}) = P(A=\text{heads}, B=6) = 1/2 \cdot 1/6 = 1/12$ . Notice that I wrote  $P(A=\text{heads}, B=6)$ .
