New emerging diseases, new diagnostic modalities for resource-poor settings, new vaccine schedules ... all significant, recent developments in the fast-changing field of tropical medicine. Hunter's Tropical Medicine and Emerging Infectious Diseases, 10th Edition, keeps you up to date with everything from infectious diseases and environmental issues through poisoning and toxicology, animal injuries, and nutritional and micronutrient deficiencies that result from traveling to tropical or subtropical regions. This comprehensive resource provides authoritative clinical guidance, useful statistics, and chapters covering organs, skills, and services, as well as traditional pathogen-based content. You'll get a full understanding of how to recognize and treat these unique health issues, no matter how widespread or difficult to control. Includes important updates on malaria, leishmaniasis, tuberculosis and HIV, as well as coverage of Ebola, Zika virus, Chikungunya, and other emerging pathogens. Provides new vaccine schedules and information on implementation. Features five all-new chapters: Neglected Tropical Diseases: Public Health Control Programs and Mass Drug Administration; Health System and Health Care Delivery; Zika; Medical Entomology; and Vector Control - as well as 250 new images throughout. Presents the common characteristics and methods of transmission for each tropical disease, as well as the applicable diagnosis, treatment, control, and disease prevention techniques. Contains skills-based chapters such as dentistry, neonatal pediatrics and ICMI, and surgery in the tropics, and service-based chapters such as transfusion in resource-poor settings, microbiology, and imaging. Discusses maladies such as delusional parasitosis that are often seen in returning travelers, including those making international adoptions, transplant patients, medical tourists, and more.

This far-reaching reference is designed with many entry points and a visually engaging format to satisfy the curious browser, the student researcher, and the earnest knowledge seeker alike.

"There are two kinds of hunting: ordinary hunting, and ruffed-grouse hunting."-Aldo Leopold, from A Sand County Almanac Like that earlier grouse hunter Aldo Leopold, Mark Parman takes to the woods when the aspens are smoky gold. Here, in an evocative almanac that chronicles the early season of the grouse hunt through its end in the snows of January, Parman follows his dog through the changing trees and foliage, thrills to the sudden flush of beating wings, and holds a bird in hand, thankful for the meal it will provide. Distilling twenty seasons of grouse hunting into these essays, he writes of old dogs and gun lust, cover and clear cutting, climate change, companions male and female, wildlife art, and stumps. A Grouse Hunter's Almanac delves into the mind of a hunter, exploring the Northwoods with an eye for more than just game. Winner, Sports and Recreation, Midwest Book Awards Bronze Medalist, Sports, Foreword Magazine's Books of the Year
