Honda VTEC Engines Explained - autoevolution

DOHC VTEC engine is the legendary B16A. A 1595cc 160-170ps engine that first appeared in the 1989 Honda Integra XSi and RSi, it now powers the famous Civic SiR models. The B16B is a special hand-tuned super high output derivative of the B16A giving 185ps and used in the Civic Type-R.

VTEC

DOHC stands for Dual Overhead Cam or Double Overhead cam (there are two cams located over head operating various intake and exhaust valves). That means each header has two camshafts. Hence, an inline engine will contain 2 camshafts as it has only one header. Flat engine and V-engine will contain 4 camshafts as they have two headers.
