Cross Reference. Here is  
some useful information that  
links Wico data with  
customer/application magneto  
data. Some applications like  
Caterpillar, Teledyne  
Wisconsin Engine and some  
small engine builders mark  
the magneto with an engine  
part number rather than the  
magneto name and model.

Guide rod for armature (GR, fig. 3) This electric current for the WICO EK Magneto was created by pulling the armature away from the magnet coil cores. The armature was connected to a rocker arm that was activated by a sliding bar. (see fig. 4) This armature movement created a current in the windings around the magnet cores.
